

BANKEZEE CONNECT

MOBILE APP — USER MANUAL

Growth Partner Guide

Calls • Leads • Files • Status • Earnings

Version 2.7.1

1. Login & Getting Around

Open the BankEzee Connect app on your Android phone, enter your Email and Password, and tap Login. Use only the account given to you by BankEzee.

Your bottom menu (tabs)

Dashboard	Your daily numbers & activity
Data	Your leads — call them & log outcomes
Files	Loan files — create & track to disbursal
Follow-ups	Customers you promised to call back
Meta	Meta leads (only if Meta is enabled for you)
More	Attendance, Reports, Policies, Logout

2. Dashboard — your numbers at a glance

The Dashboard opens first. A toggle at the top switches between This Month and Lifetime totals. Read it top to bottom.

What the cards mean

- This Month / Lifetime: tap to switch. "This Month" resets monthly; "Lifetime" is your all-time total.
- My Data — Follow Up, Lead and File counts assigned to you.
- Today's Activity — Calls, Outgoing, Incoming, Total Talk time, Idle Time and your Login Time for today.
- Call Outcomes — how many calls Connected vs Not Connecting today.
- Status Breakdown — how your leads are split across Lead / File / Follow Up.

■ TIP

Check your Dashboard every morning and evening to see your calls, follow-ups and files at a glance.

3. Leads & Calling

Open the Data tab to see your leads. Tap a lead to open it, then tap Call. When the call ends, the app shows the Post-Call screen — always fill it in.

The screenshot shows the 'Log Call Outcome' screen in the app. At the top, a green header bar contains the title 'Log Call Outcome'. Below this, the text 'How did the call go?' is displayed. A green box highlights the 'Call Duration: 2m 14s (from call log)' text. Underneath, the 'Call Outcome *' section features several buttons: 'Connected' (green), 'No Answer' (grey), 'Switched Off' (grey), 'Not Connecting' (grey), 'Busy' (grey), 'Wrong Number' (grey), and 'Voicemail' (grey). The 'Update Status (optional)' section has four buttons: 'New' (blue), 'Follow Up' (purple), 'Lead' (green), and 'File' (red). Below this is the 'Notes (optional)' section with a text input field labeled 'Add call notes / next step...'. At the bottom are 'Cancel' and 'Save' buttons. Three green callout boxes with arrows point to specific elements: the first points to the 'Connected' button, the second points to the 'Follow Up' button, and the third points to the 'Save' button.

Log Call Outcome

How did the call go?

■ Call Duration: 2m 14s (from call log)

Call Outcome *

Connected No Answer

Switched Off

Not Connecting Busy

Wrong Number Voicemail

Update Status (optional)

New Follow Up Lead File

Notes (optional)

Add call notes / next step...

Cancel Save

Pick ONE outcome. "Connected" = you spoke to them.

Set status to Follow Up (and a date) if they want a call back later.

Tap SAVE — the call is only recorded after you save.

■ IMPORTANT

ALWAYS complete and SAVE the Post-Call form after EVERY call. If you skip it, the call, outcome and follow-up are not saved and your numbers will be wrong.

4. Files — creating a loan file

■ IMPORTANT

If you already have a confirmed customer, create the File DIRECTLY from the Files page. You do NOT need to add them as a Lead first.

Path: Files → Add New File → Customer Details → Type of Loan → Loan Amount → Create File

Add New File

Type of Loan
New Vehicle Loan ■

Assign to Growth Partner
Myself Assign

Create File

Tap Add New File on the Files page to open this form.

Choose the CORRECT Type of Loan — it decides the required details, eligibility and (for Vehicle loans) the extra vehicle checks.

Tap Create File to save.

■ TIP

Vehicle loans (New Vehicle Loan, Used Vehicle Loan (Fresh), Used Vehicle Loan BT) unlock extra vehicle sections in File Details — always pick the exact type.

5. File Details — read the full picture

Tap any file to open File Details. Scroll to see every section. This is where you check the latest processing update.

You can EDIT

- Customer Details, Loan Requirements (type/amount), Employment, Profile Analysis (CIBIL Issues, FOIR %, Company Type), Existing Loans.

View only (updated by Ops/Bank team)

- Bank Eligibilities, Login info, Approval info, Document/processing info, Disbursement, Commission/Earnings, Activity Log.
- Vehicle loans also show TVR/EMI pre-verification, RC / NOC / Hypothecation checks and vehicle eligibility.
- *You add banks via "Check Bank Eligibility"; the login/approval/disbursal results are filled by the processing team.

■ TIP

Check File Details FIRST for the latest Login / Approval / Disbursement update instead of asking Ops for something already in the app.

6. How to read File Status

FILE

LOGIN

APPROVED

DISBURSED

A healthy file moves left to right. Some files also show interim/negative statuses — here is what each

	What it means	What you should do
New / Contacted	File just created / first contact done	Collect documents & basic details
Documents Collected	Customer documents received	Run Check Bank Eligibility
Sent to Bank	File submitted to a bank	Wait for login; keep customer informed
Login	Bank has logged in the case	Track for approval; upload pending docs
Not Login	Bank did not log in the case	Fix reason / try another eligible bank
Approved	Bank approved the loan	Share approval; complete disbursal steps
Declined / Rejected	Bank rejected the case	Check reason; try another bank if eligible
Disbursed	Loan amount paid out	Done — your commission is recorded
Not Disbursed	Approved but not paid yet	Complete pending steps for disbursal

■ TIP

Interim reject = a temporary hold/objection you can still fix. Final reject = the bank has closed the case. [Read the reason in Activity Log.](#)

7. Eligibility

From File Details tap Check Bank Eligibility to open the Bank Eligibility Analysis. It shows the customer profile and which banks the file is eligible for.

- Green = Eligible, Red = Not Eligible for that bank.
- The list is based on the customer profile & loan type you entered.
- For vehicle loans, vehicle-specific rules are included in the check.
- Previous Checks / History let you re-open earlier eligibility results.

8. Meta (only if enabled for you)

If the Meta tab is visible, you have Meta access. Meta leads work just like normal leads:

Meta Lead

Call

Outcome

File

■ TIP

No Meta tab? That simply means Meta access is not enabled for your account — everything else still works normally.

9. Stats, Reports & Earnings

Your Dashboard already shows most numbers. Use the month toggle to see a specific month. Watch

Commission is recorded when a file reaches Disbursed. Always keep files moving to disbursal that is what pays you.

10. Attendance (Check In / Check Out)

Open More → Attendance. Tap Check In when you start and Check Out when you finish. Choose WFH if you are working from home; the app may capture your location for office attendance.

7 GOLDEN RULES

Follow these every day to grow your earnings

- 1 Always log and **SAVE** the outcome after **EVERY** call.
- 2 Set follow-ups correctly (with a date) so no customer is forgotten.
- 3 Select the **CORRECT** loan type on every file.
- 4 Create confirmed customers as Files directly from the Files page.
- 5 Check File Details regularly for Login / Approval / Disbursement updates.
- 6 Check the app before asking Ops for a status already shown in the app.
- 7 Never share your BankEzee Connect login with anyone.

More calls → more files → more disbursals → more earnings
